

TOP 3

FUTURE-PROOF TECHNOLOGIES FOR SMART PARKING*

1

M5 SINGLE-SPACE SMART PARKING METER

IPS flagship product and latest generation of single-space Smart Parking meter, the M5, provides wireless connectivity, solar power, diverse payment options including credit/debit card, remote configuration, access to real-time parking meter data, and a web-based meter management system.

2

DOME-MOUNT SENSORS

Integrate advanced rate structures and guidance into your City's Smart Parking program. IPS Dome-Mount Sensors auto-baseline and improve accuracy over time. With installation directly into the meter dome, it's the easiest on-street replacement and maintenance of any sensor on the market.

3

BLE - BLUETOOTH LOW ENERGY

Grant patrons the convenience of Smart Payments through apps like Apple Pay and Google Wallet with power-efficient BLE technology. BLE also enables the integration of technology like IPS Smart Collections, which improves collections through advanced auditing and real-time reporting.

**Technologies listed are only available through the IPS M5 single-space meters with dome-mount sensors.*

WHAT WOULD YOUR CITY DO WITH 25 - 50% MORE REVENUE?
