

TOP 3

WAYS SENSORS WORK FOR SMART CITIES

1

INCREASE TURNOVER

Prevent piggybacking and increase accessibility by resetting IPS Smart Parking meters to zero when a vehicle leaves the space.

2

ENABLE COMPLEX RATE STRUCTURES

IPS customers may be entitled to a savings of 15-25% on lower negotiated credit card and merchant fees.

3

MANAGE ENFORCEMENT

Facilitate more efficient enforcement with data that directs parking enforcement officers to locations with vehicles in violation.

WHAT WOULD YOUR CITY DO WITH 25 - 50% MORE REVENUE?
